All, sorry for the silence on the workshop but the hotel contracts were signed on the 31st.

I need some assistance getting a program together. I am sending our last program.

The workshop will be on the 25th and 26th of February so I need to get publicity out for the meeting soon. I need topics for the speakers and if we need to invite anyone I need to do that soon.

I also need a mailing list if we have one for sending a meeting notification out. Since Dave did that last time I don't have access to anything that may have been sent.

Majula and Antonio if there are any new contacts for Missouri or Iowa I need those. I thought you both sent me that information but I can't find it.

Dave Franzen, I included you only because you were the last person to organize the meeting and if you have any information that would help I would appreciate it especially if you have a list of contacts you sent the meeting out to.

If there is anyone on the industry side that would be of interest to hear speak let me know.

Based on the agenda attached we could use about 8-10 speakers.
