September-19-2013

Dear North Central Regional Association,

On behalf of NCERA-212:

The NCERA soybean disease committee currently known as NCERA-212, was formerly known as NCERA-137. It is now time to renew this committee. Due to the number of accomplishments that our committee has had, we would like to request that we resume the use of NCERA-137. Our stakeholders are familiar with the accomplishments of this group and switching back to our historic 137 number will allow us to maintain identity.

A vote was taken at the NCERA-212 business meeting held in St Louis, MO on February 14th, and all were in favor of using NCERA-137 in our renewal. If you have any questions please do not hesitate to contact me.
