Agricultural Research Center
403 Hulbert Hall
Washington State University
Pullman, WA 99164-6240

RECEIVED

MAY 07 2007

AG. RESEARCH CENTER

I am writing to indicate that I am very interested in continuing my participation in the activities of WERA 1001, Rural and Agricultural Surveys when it is renewed. I am involved in designing and conducting surveys and would benefit from collaborating with WERA participants to improve my own surveys.

Additionally, I am interested in working with others on designing, interpreting, and/or disseminating results of research on ways of improving the conduct of sample surveys that are used by my university to advance science on Cooperative Extension needs assessments and program impact measurements, in addition to subject area interests, such as water resource policies and public policy education and research.

Sincerely,

Loretta Singletary, Ph.D.
Professor and Extension Educator
University of Nevada Cooperative Extension (UNCE)
